

## Seven e-learning Courses for Surjer Hashi Network: A Self-Learning Process to Enhance Health Professionals Competencies

BCCP developed **Seven e-learning Courses** and content development for Surjer Hasi Network (SHN) professionals under the Advancing Universal Health Coverage (AUHC) Project implemented by Chemonics International Inc. in 2023.

The Surjer Hashi Network e-learning course is designed for doctors, paramedics, and nurses, providing them with current knowledge to enhance their competencies. This is a self-learning course. This course will support all government and non-government field-level workers in the health, family planning, and nutrition sectors by advancing their professional skills and understanding. The protocols for maintaining the labor room and preventing infections will be enhanced. Consequently, healthcare services related to safe delivery and risk management will become more efficient.

### Course Contents

The Seven e-learning Courses consist of the following contents:

1. Safe Delivery and Risk Management

2. Comprehensive Newborn Care Package (CNCP)

3. Labor room protocol

4. Family Planning Counseling

5. FP-IUD (Family Planning Method - Intrauterine Device)

6. Family Nutrition Counseling

7. Infection Prevention

Each course integrates dynamic methods that utilize a variety of formats, such as videos, quizzes, case studies, testimonials, and more, to actively engage participants in an enjoyable manner.

## Course Duration

Each module of the course takes 15–20 minutes to complete. Participants can take the course as many times as needed at their convenience. At the end of the course, they will be able to assess their learning progress.

## Course Materials

Participants have the option to download or print the course materials in PDF format if desired. The course features videos, animations, and audio resources. To access the video and audio content, participants must have speakers or headphones available.

## Pre- and Post-Course Assessments

This e-learning course includes pre-course and post-course assessments.

The pre-course assessment helps participants evaluate their existing knowledge of seven e-learning courses. The post-course assessment helps them understand what they have learned from the course.

Each assessment takes 10–15 minutes to complete.

All participants must complete both the pre and post-course assessments.

## Completion of the Course and Certification

To receive a completion certificate, learners must go through all the course modules. A score of 85% or higher on the post-course assessment will earn them a certificate, which is available for download as a PDF.

## Access for Visitors

Visitors participating in the course will not have access to the assessment feature.
